REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: although the prior art teaches component "A" polymers as claimed with fatty acids of various types, the claimed combination with hydroxy functional fatty acids reacted with anhydrides is not taught. The reaction of modified fatty acids of this type is known in the prior art reacted with carboxylic acid polymers, but only with other crosslinkers such as isocyanates, which result in cured high molecular weight polymers. The combination of reactants in applicant's claims producing polymers with the characteristics required is neither taught nor rendered prima facie obvious from the closest prior art as cited. Applicant's claims are, therefore, both novel and unobvious over the closest prior art as cited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernard Lipman whose telephone number is 571-272-1105. The examiner can normally be reached on 8-5 Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on 571-272-1114. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
